

WEBCAST
7 pm (EDT)
October 13, 2010

Model Lighting Ordinance

Nancy Clanton, Chair IES MLO Task Force, PE, FIES, LC, IALD, Principal, Clanton & Associates

This presentation will provide you with an overview of the Model Lighting Ordinance (MLO), as developed in association with International Dark Sky Association. Participants will learn how the MLO:

- Permits reasonable uses of outdoor lighting for night-time safety, utility, security, productivity, enjoyment and commerce
- Minimizes adverse offsite impacts including light trespass and obtrusive light
- Curtails light pollution and improves the nighttime environment for night-sky viewing and astronomy
- Helps protect the natural environment from the adverse effects of night lighting from gas or electric sources
- Conserves energy and resources to the greatest extent possible

To register: Individuals can self-register, or join their colleagues at a participating IES Section Meeting on Wednesday, October 13, 2010 for an informative educational experience. Registration starts Monday, August 23, 2010 at www.ies.org/education. Participating IES Sections will be listed with contact information.

Cost: \$195 for the Live Event. No handout or post-webcast recording for this event.

Duration: approx. 45 minutes, plus Q&A (60 minutes total).

Continuing Education Eligibility: (1) IES CEU / AIA LU / USGBC CE credit

Facilitators: *All participants must complete the post-webcast Survey to receive CEU credits, which requires facilitators to capture participant email addresses*

For registration information, contact Pat McGillicuddy, IES Manager of Technology, at pmcgillicuddy@ies.org, or Tim Heck, IES Section Coordinator, at theck@ies.org.
