Meal:**

6.30PM – 7:00PM

Presentation:

7:00 PM – 8:30PM

Where:

**AECOM
1155 21st St NW – 10th Floor
Washington, DC 20036**

Cost:

\$25 – per person
payable at the door
(cash or checks only)

**1.5 AIA LU's
1.5 NCQLP LEU's**

Topic:

The webcast will provide you with state-of-the-art information on:

- How controls can lower energy use while providing a variety of options for different at-home tasks, including family rooms, media rooms, home offices, exterior security lighting and daylight control for Residential Projects.
- How to engage with local contractors for installation and training, as well as program “tweaking” on a long term basis.
- How Commercial Commissioning is becoming ever more important in ensuring that controls are properly installed and operated according to specifications. Participants will learn how to start a project with the right tools and how to design the project with controls in mind.

About the speakers:

Manny Feris, a Senior Sales Engineer at Lutron Electronics, Inc.(manufacturers of lighting controls and shades) is part of the Lutron Residential Interiors Team. Manny is a Past President of the IES New York Chapter, past Chairman/Judge for the Lumen Awards Program/NY Chapter, a member of the DLF-NY. Manny teaches a lighting elective at the Architecture School at NJIT and is Accredited by the NY Region of the American Arbitrator Association.

Kyle Gottliebson is a Lighting Control Specialist with Square D, with extensive experience in specifying, commissioning, and validating advanced lighting control systems. Kyle is active within the IES and is an instructor for the control segment of ED-150, as well as being Past President of the West Texas Section and currently District 4 Web Chair. Kyle is an instructor for BOMA and AIA lighting courses.

Join your colleagues for an enhanced educational experience. Duration: approx 70 minutes + C+A
